Some general insights

overall success rate

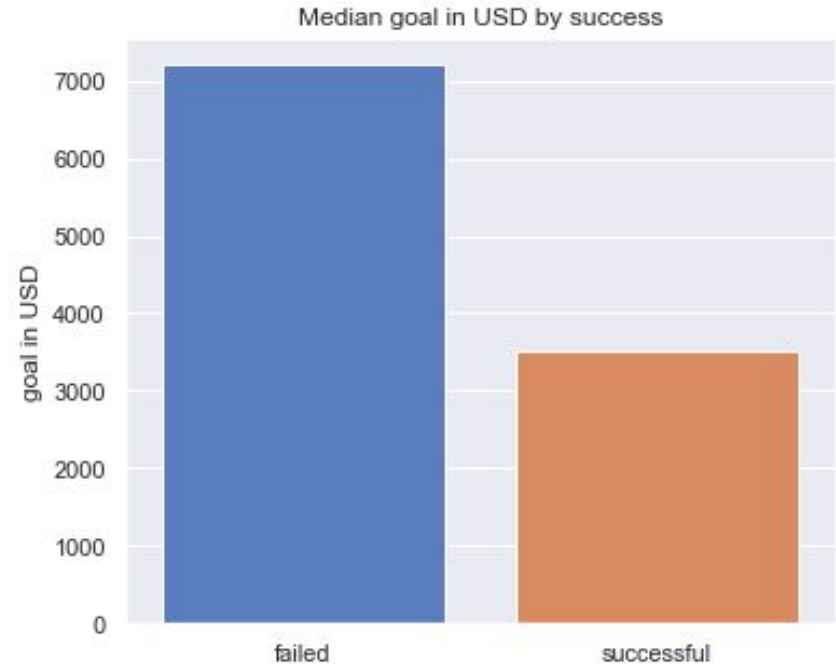

56.09% successful
(out of 168.979 campaigns)

setting smart goals

Median goal of “successful” at around half of median goal for “failed”.

Campaigns with high goals have a lower success-rate.

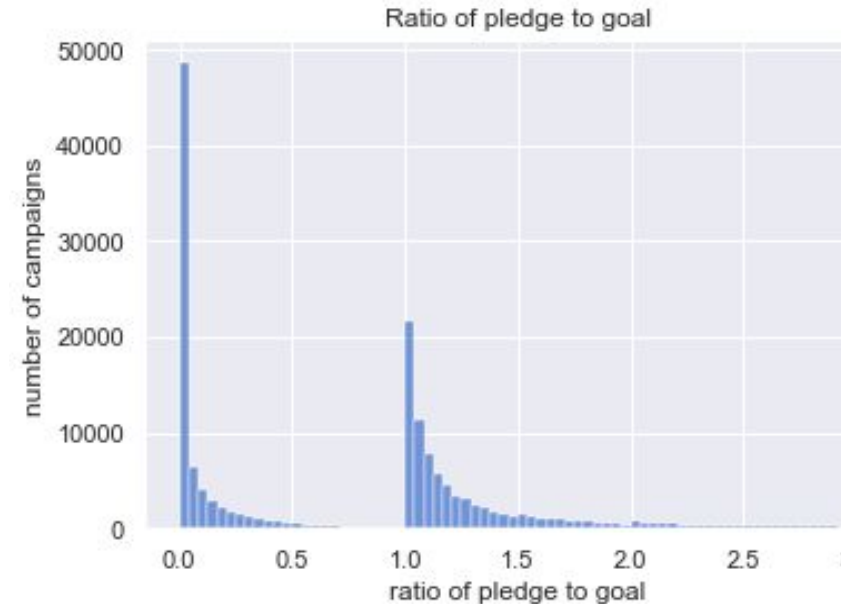

“top or flop”

Successful

- median = 117.43% of goal
- 19.74% of projects exceed their goals by >100%

Fail:

- 3.22% reach beyond 50%

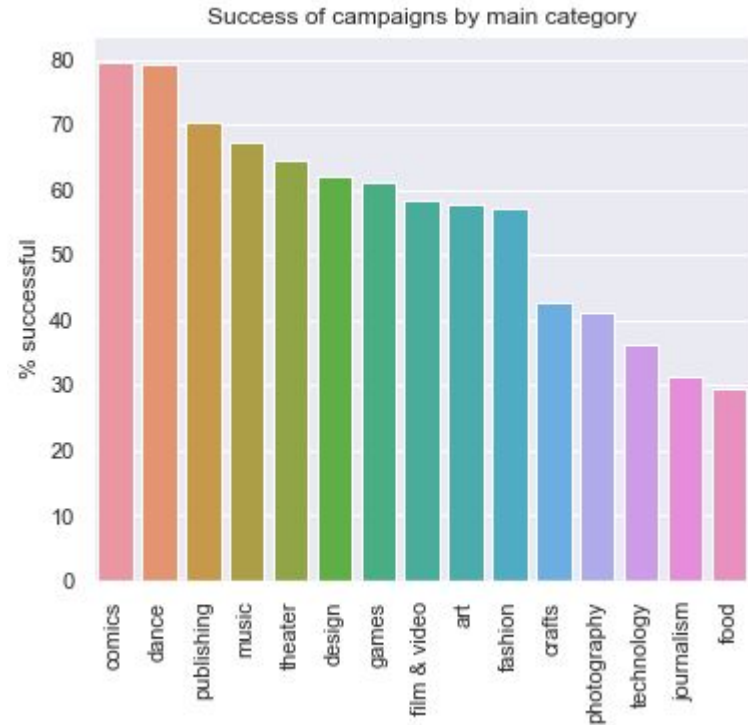

> category (success rates)

Some categories are generally very successful.

- comics
- dance
- publishing

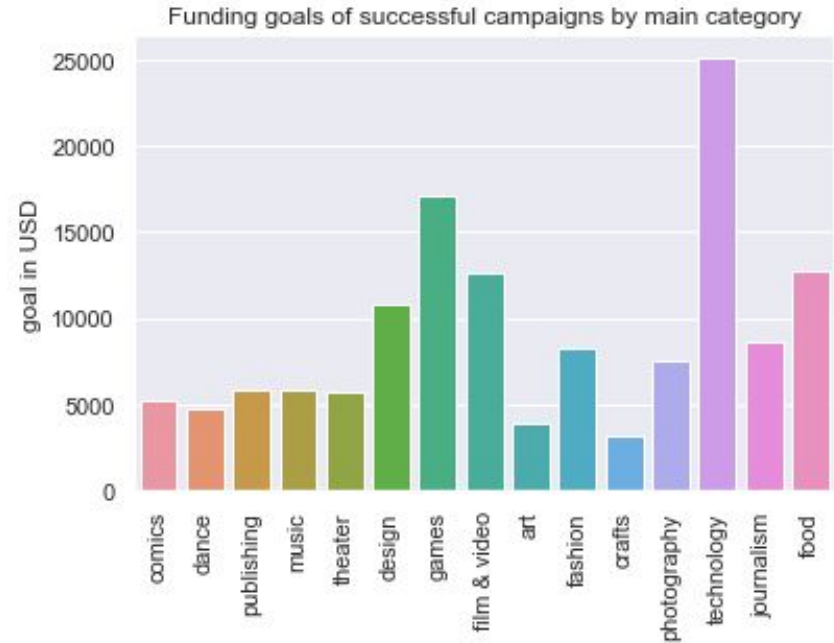

Some categories tend to be less successful

- technology
- journalism
- food

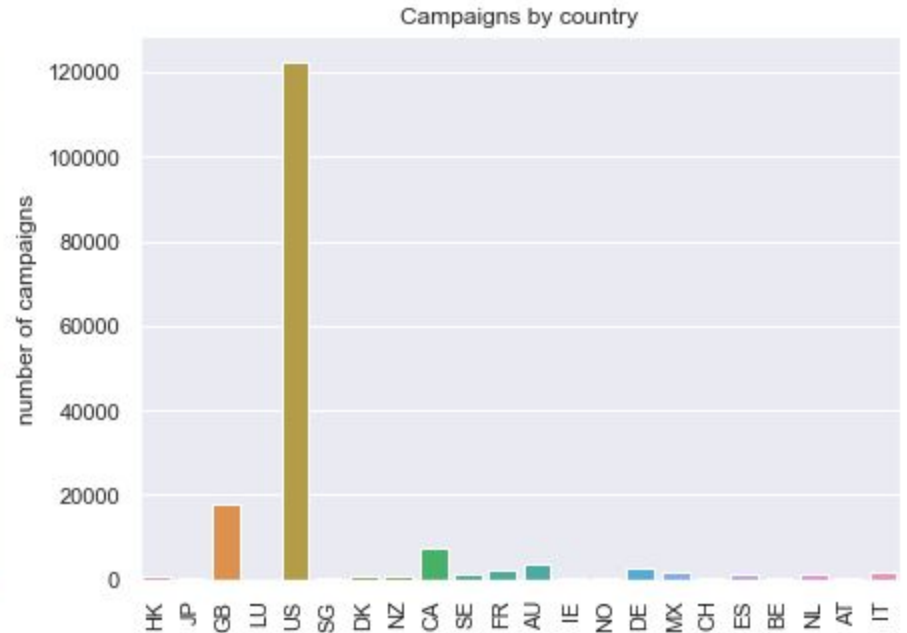

> category (mean funding goals)

- Categories:
differ in average funding goals
- High success rates:
come with lower funding goals
- Risk/revenue
 - low: *comics, dance*
 - medium: *games*
 - high: *technology*

> country

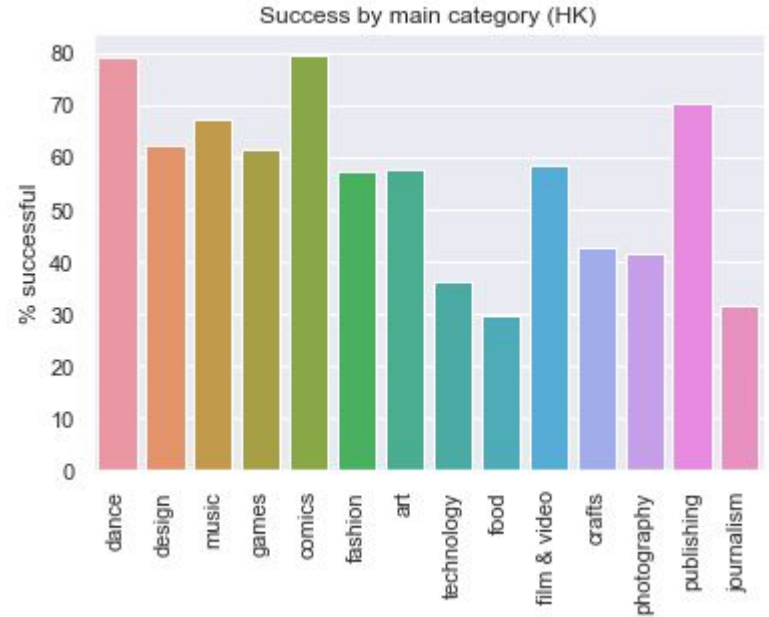

Ranking (success rate): 1. Hong Kong, 2. JP, 3. GB

Most reliable predictions: US

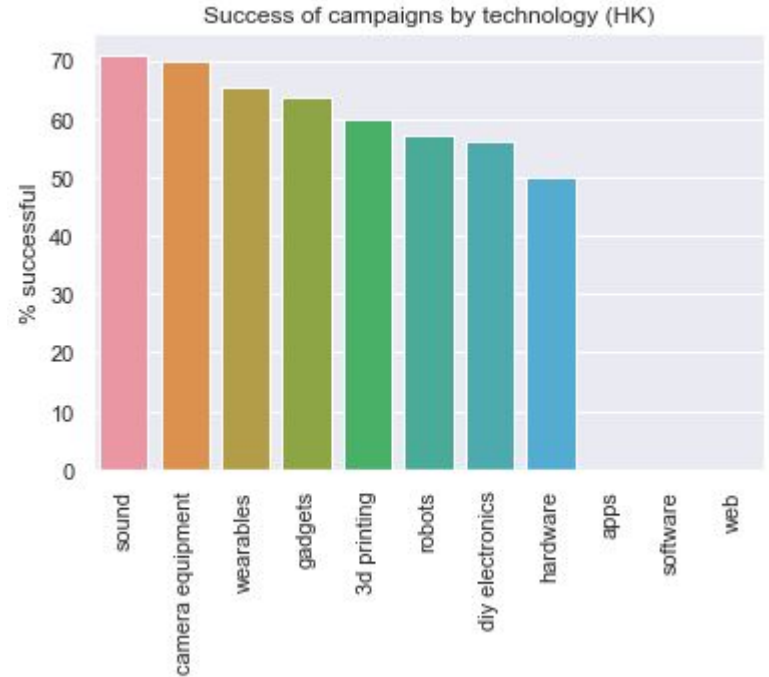

> country > HK

- Similar success rates for main categories

> country > HK > technology

- Similar success rates for main categories
- Some subcategories in > technology perform significantly better
 - sound
 - camera equipment
 - ...

predicting on descriptions

- goal: Prediction of success for games campaigns in US
- features: Bag-of-words from description
- model: Logistic regression with TFidf
- precision: 79.3%
- positive features: tabletop/board games, adventure, fantasy
- negative features: mobile/apps/android, trump

predicting on descriptions

- goal: Prediction of success for games campaigns in US
- features: Bag-of-words from description
- model: Logistic regression with Tfidf
- precision: 79.3%
- positive features: tabletop/board games, adventure, fantasy
- negative features: mobile/apps/android, trump

Conclusions

Categories matter!

Diversify your portfolio with comics, games and technology

Be smart about sub-categories

Set realistic goals!

Campaigns with high goals are likely to fail

Low goals bring low revenue

Invest in nerds!

Tabletop, fantasy and adventure are likely to be successful

Don't support Trump or mobile gaming!
